

Shade Made Simple

Discover how Sail City's premium shade sails protect your family and outdoor spaces.

Why UV Protection Matters

Skin Health at Risk

UV radiation is the leading cause of sunburn and long-term skin damage — a serious concern for families spending time outdoors.

Meaningful Reduction

High-quality shade sails significantly reduce UV exposure in exactly the spaces where families linger longest.

Full Outdoor Protection

Beyond skin, quality shade protects furniture, cushions, and outdoor equipment from accelerated sun damage.

OUR STORY

The Sail City Difference

Two decades of precision craftsmanship, locally made and proudly installed across Australia.

20+

Years Experience

Designing and installing custom shade solutions across Australia

Installations

Completed projects for Australian homes and businesses

100%

Australian Made

Owned, manufactured, and installed locally

10-15 yrs

Fabric Guarantee

10 to 15 years warranty on premium fabrics

Our Fabric Technology

Every Sail City shade sail is built around commercial-grade fabrics engineered specifically for Australian climates — where the sun is relentless and materials must perform year after year.

- **UV-R blocking** ranges from 83% to 100% depending on fabric and color selection
- **Shade levels** from 62% to 98% for fully customized outdoor comfort
- Fabrics chosen to match your site conditions, not just aesthetics

Four Premium Fabric Options

Rainbow Shade Z16

Australia's most trusted shade sail fabric

83–99% UV-R blocking

Rainbow Shade Extreme 32

Maximum protection for harsh climates

89–96% UV-R blocking

Rainbow Shade DriZ

Superior water management performance

93–100% UV-R blocking

Polyfab Comshade®

High-performance alternative fabric

92–97% UV-R blockin

Color Matters

Your color choice is more than an aesthetic decision — it directly affects how much UV protection your shade sail delivers.

- **Darker colors** – black, charcoal, navy – provide maximum UV protection, up to 99% blocking
- **Lighter colors** – white, cream – offer beautiful aesthetics with slightly lower UV blocking performance
- Always request a **physical fabric sample** before committing – screens cannot accurately represent true color or texture

Built to Last

Marine-Grade Hardware

316 stainless steel fittings resist corrosion in coastal and high-humidity environments.

Powder-Coat Steel Posts

Finished steel posts deliver structural strength with long-lasting weather resistance.

Engineered Design

Every installation is calculated for your specific site conditions, wind loads, and local climate.

Ongoing Support

Regular maintenance keeps your shade sail performing at its peak throughout the warranty period.

Our Process

Site Visit

Measure and discuss client needs on location.

Design

3D model for shape, coverage, and colour selection.

Fabrication

Custom-cut and sewn in Perth to your specifications.

Installation

Our team installs and tensions the full system.

Support

Maintenance and repairs throughout the warranty period.

From first consultation to long-term care, Sail City manages every step — so you can enjoy your outdoor space with complete confidence.
